## **Grating Tasmania FRP Quality Policy**

It is our Company Policy to only stock the highest quality FRP products available. There are cheaper products available on the market, however, they are of inferior quality and do not conform to the requirements of Grating Tasmania's product standards.

*To ensure quality FRP products the following standards are required as a minimum*

- All FRP product stocked by Grating Tasmania must be **ISO 9001& ASTM E-84** compliant
- All FRP Handrail stocked by Grating Tasmania must be manufactured in accordance with Australian Standard **AS1657-1992**.
- All FRP products stocked by Grating Tasmania must contain UV Inhibitors & Fire Retardants.
- All FRP must be load tested, manufacturers are required to supply their own product specific Load Tables, we will not accept FRP supplied with generic Load Tables.
- All fixing clips, including fasteners (B/N/W or Screws) are to be 316 Grade Stainless Steel.

To ensure high quality standards, all shipments of FRP are photographed and the images sent to Grating Tasmania for approval prior to shipping.

Any inferior FRP product delivered will be rejected by Grating Tasmania.
